Summary

Passionate Full Stack Developer with experience in building and maintaining scalable web applications using the **MEAN Stack**. Currently working as an **SDE-1 at Akrivia HCM**, contributing to the development of modern **HRTech** solutions. Proficient in developing efficient backend APIs, responsive frontend applications, and delivering clean, maintainable code with a strong focus on performance and user experience.

Education

Sagi Rama Krishnam Raju (SRKR) Engineering College	2021 – 2025
<i>B.Tech in Computer Science and Engineering</i>	CGPA: 9.03
Sasi Junior College	2019 – 2021
<i>Intermediate (MPC)</i>	Percentage: 98.5%
Sasi Academy	2018 – 2019
<i>Secondary School Certificate (SSC)</i>	GPA: 10.0

Experience

Akrivia HCM, Hyderabad **Dec 2024 – Present**

Software Development Engineer I

- Built the new **Interview Analytics Dashboard** featuring real-time metrics on pipelines, conversions, and recruiter activity.
- Enhanced backend reliability and scalability using **Node.js, Knex.js, and Objection.js**, improving API response times by **15–20%**, strengthening query performance, and reducing bottlenecks.
- Built and integrated **SpotDraft offer letter workflows**, streamlining document generation and approval processes.
- Developed comprehensive **unit test coverage** for the entire Recruitment module, improving application reliability, code maintainability, and defect detection efficiency.

Software Development Engineer Intern

- Contributed to the **Recruitment module** by building a dynamic **Career Page** that enhanced candidate engagement.
- Added full **internationalization (i18n)** capability, enabling seamless multi-language support across the product.
- Enhanced backend performance by refactoring legacy modules and optimizing **Node.js APIs** for speed and reliability.
- Integrated **Zwayam** job-posting workflows through efficient API orchestration and stability improvements.

Projects

Inventory Management 🗄 | *Angular.js, Node.js, MySQL, AWS S3* **January 2025**

- Engineered a full-stack inventory platform with bulk upload, validation logic, and secure AWS S3 file handling.
- Introduced asynchronous processing to smoothly manage large data imports without blocking the UI.
- Enabled Role-Based Access Control (RBAC) and real-time team communication via integrated broadcast chat.
- Added automated low-stock alerts and streamlined reporting for improved decision-making.

Attendance Management System 🗄 | *JavaScript, PHP, MySQL, Geolocation API* **June 2024**

- Built a location-aware attendance system using **geofencing**, ensuring accurate, boundary-based check-ins.
- Crafted a clean and intuitive interface tailored for ease of use by students and instructors.
- Achieved nearly **70% reduction** in manual tasks while significantly boosting accuracy and reliability.
- Set up secure backend workflows in **PHP + MySQL** for data validation and safe record storage.

Technical Skills

Languages : C, Java, Python, HTML, CSS, JavaScript, TypeScript.

Frameworks : Angular.js, Node.js, Express.js.

Developer Tools: VS Code, Git, SQL Workbench.

Cloud/Databases: MySQL.

Certifications

PMKY Certificates: Completed a series of skill development courses under the Pradhan Mantri Kaushal Vikas Yojana (PMKY) to enhance vocational expertise and employability.

HackerRank Java (Basic)

British Council English Strokes: Developed English language proficiency through an interactive learning program designed to improve communication skills and workplace readiness.

Smart India Hackathon: Participated in a nationwide innovation challenge, collaborating in a team to develop a functional prototype addressing real-world problems using technology and creative problem-solving skills.
